Arms Finishing Blow

=====

■ Introduction

Thank you for using "Arms Finishing Blow" (hereinafter referred to as "this software"). This software is an animation asset created by Genfulew_Effect and includes effects for weapon attacks.

■ About this software

This software is a collection of effect assets designed to add color and flair to your original game creations. It includes effects using 13 types of weapons, ranging from classic choices such as swords and spears to more unique options like musical instruments and heavy firearms.

■ System Requirements

System supporting "RPG Maker MZ".

■ How to use

To use these effects in your RPG Maker MZ project, please follow the steps below:

1. From the extracted folder, copy the entire **"Genfulew_Effect"** folder into your project's **"effects"** folder.
 - ⚠ Do not copy only the files inside **"Genfulew_Effect"** directly into the **"effects"** folder. Doing so may cause conflicts with other creators' files.
2. If your project already has a **"Genfulew_Effect"** folder, simply overwrite it.
3. Open RPG Maker MZ. Go to **Tools** → **Database** → **Animations** → **Particle Effects** → **Filename**.
From there, open the **"Genfulew_Effect"** folder and choose the effect you want to use.
4. Alternatively, you can copy the animation settings directly from the included RPG Maker MZ sample project and paste them into your main project.

END USER LICENSE AGREEMENT
IMPORTANT, READ CAREFULLY.

This asset is a product for RPG Maker MZ, however, the terms and conditions of use are

subject to the terms and conditions in the URL below. Please refer to the following URL.
